

Super Sul 26TM

Quality Liquid Sulfur Concentrate

FOR COMMERCIAL USE ONLY

PRECAUTIONS

Avoid getting in eyes or on skin. The use of side shield safety glasses and gloves is recommended. Harmful if swallowed. Avoid contact with eyes, skin, and clothing. If on skin, remove contaminated clothing. Wash with large amounts of soap and water. If in eyes, rinse repeatedly with clean water for 15 minutes. If irritation persists, obtain medical attention. See MSDS for further information.

DISCLAIMER

It is recommended not to use this product with fungicides or pesticides. However, if applied with a fungicide or pesticide, it is the users responsibility to conduct a trial application on the crop(s) to be sprayed with this mix of chemicals to determine compatibility of products and compatibility with crop(s) sprayed. When mixing with other spray materials a jar compatibility test is recommended.

CONDITIONS OF SALE

UAS of America Inc. warrants that this product conforms to the chemical description on the label thereof and is reasonably fit for purposes stated on the label when used in accordance with directions under normal use conditions. Crop Injury, product use ineffectiveness, or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of UAS of America Inc. In no case shall UAS of America Inc. or it's be liable for consequential, special or indirect damages resulting from the use, handling, or shipping of this product. All such risk shall be assumed by the buyer /end user. UAS of America Inc. makes no warranties of merchantability or fitness for a particular purpose nor any other express or implied warranty except as stated above.

CAUTION: KEEP OUT OF REACH OF CHILDREN

Product # 196

SULFUR is recognized as a secondary plant nutrient. It is in the class class as CALCIUM and MAGNESIUM. All life needs SULFUR to survive. In it is an essential nutrient for two major reasons. *It is the enzyme activator necessary for the plant to induct nitrogen. *It is essential for protein synthesis. SULFUR is a constituent of three amino acids (cysteine, methionine, and cysteine) and is therefore essential for protein synthesis. It is essential for nodule formation on legume roots. SULFUR is present in oil compounds responsible for the characteristic odors of plants such as garlic and onions. Most legume crops require SULFUR fertilization. SULFUR is part of the make up of enzymes and proteins. It also aids in the metabolic functions of the plant. Low SULFUR readings in your soil can mean that you may experience a deficiency in Nitrogen and Manganese. Most soils low in SULFUR are usually low in organic matter, having a coarse texture, and probably a high pH. We also know that when a crop is supplied with a sufficient amount of SULFUR, crops are greener and quantity and quality of yields increase, increasing profits.

Storage: Keep container sealed tightly when not in use. Do not expose to sunlight for long periods of time. Store in temperatures between 5 C (41 F) and 25 C (77 F).

GUARANTEED ANALYSIS:

12-0-0 +26S

Total Nitrogen (N).....12.00%

12.00% Ammoniacal Nitrogen

Sulfur (S).....26.00%

Derived from: Ammonium Thiosulfate

DIRECTIONS FOR USE:

Soil: Apply 1 gallon with sufficient water to cover per acre. Broadcast directly onto soil at pre-planting. For best results incorporate into the top 1-2 inches.

Apply when sulfur readings are low in soil.

Foliar: Row Crops: Mix 1-2 pt(s) with sufficient water to cover, per acre. Mist tops and bottoms of leaves. Moisten only to the point of run-off. (Use Minimum of 15 Gallons of Water.)

Tree Crops: Mix 1-3 qt(s) with sufficient water to cover, per acre. Mist tops and bottoms of leaves. Moisten only the point of run-off. (Use Minimum of 100 Gallons of Water.) Apply when sulfur deficiency is determined by visual or leaf analysis. Extent of deficiency will determine amount to use.

**** DO NOT OVER APPLY, BURN MAY RESULT****

***Highly concentrated DO NOT over apply. *** To ensure compatibility with foreign spray mixes, a jar compatibility test is recommended before mixing with other products other than water in the tank. Always fill tank with water first, then begin applying CROPMASTER products while tank is circulating. "NEVER MIX CONCENTRATES DIRECTLY TOGETHER "
