

SUPER 9-18-9™

A Hot mix Liquid NPK, SUPER 9-18-9™ is made from high grade, high quality, natural ingredients, making this liquid NPK very pure and clean. Plants will utilize more readily and quicker than comparable water soluble NPK. SUPER 9-18-9™ is tipped to give your plants and turf the right amount of growth while helping concentrate its energies to bulk, thicken, increase size and overall density of plant, fruit and turf.

SUPER 9-18-9™ should be used when fruit is in its forming stage after fruit set. For turf it can be applied just after the growth season before dormancy

STORAGE

Keep container sealed tightly when not in use. Do not expose to sunlight for long periods of time. Store in temperatures between 5 C (41 F) and 25 C (77 F).

Dispose of Waste Material according to local, state, and Federal environmental laws and regulations.

CAUTIONS

Because of the nature of high phosphate care should be taken when mixing with humic acid and or Calcium products. Always do a jar compatibility test before mixing any two products other than water in your tanks.

DISCLAIMER

It is recommended not to use this product with fungicides or pesticides. However, if applied with a fungicide or pesticide, it is the user's responsibility to conduct a trial application on the crop(s) to be sprayed with this mix of chemicals to determine compatibility of products and compatibility with crop(s) sprayed. Harmful if swallowed. Avoid contact with eyes, skin, and clothing. If on skin, wash with large amounts of soap and water. If in eyes, rinse repeatedly with clean water. If irritation persists, obtain medical attention.

**Ingestion: If patient is conscious, give large quantities of water. Do not induce vomiting. Call physician.*

GUARANTEED MINIMUM ANALYSIS

Total Nitrogen (N)	9.000%
5.67% Ammoniacal Nitrogen	
3.33% Nitrate Nitrogen	
Available Phosphate (P2O5)	18.000%
Soluble Potash (K2O)	9.000%

Derived from: Orthophosphate Acid, Ammonium Phosphate, and Potassium Phosphate

COMPATIBILITY

A jar compatibility test is recommended before mixing with any other product other than water in the tank to insure compatibility with foreign spray mixes.

Not compatible with high concentrated Calcium, carbon or low pH mixes.

APPLICATION

LAWNS/TURF: Apply at a rate of 1 quart per 4000 SQ. FT. Set hose end dial at 2oz per gallon. Apply every 3-5 weeks.

ONAMENTALS: 0.5 to 1oz Super 9-18-9™ per gallon of water mix. Mist tops and bottoms of matured plant leaves. Use after blooming stage.

ROW CROPS: Mix 1-2 quarts Super 9-18-9™ with sufficient water to cover, per acre. Mist tops and bottoms of leaves. Moisten only to the point of run-off. USE A MINIMUM OF 5 GALLONS OF WATER. Apply after Fruit has changed color or is beginning to mature.

TREE CROPS: Mix 1 gallon Super 9-18-9™ with sufficient water to cover, per acre. Mist tops and bottoms of leaves. Moisten only to the point of run-off. USE A MINIMUM OF 50 GALLONS OF WATER. Apply after Fruit has changed color or is beginning to mature.
