

Super Hume Plus™

SUPER HUME PLUS™ was formulated to aid in any foliar spray program. Its chelating agents help to increase the effectiveness of your spray chemical, fertilizers, pesticides, and herbicides. "A compatibility test is always recommended".

SUPER HUME PLUS™ will chelate other sprays, ie; herbicides, when mix together in tank. For this reason you can foliar apply SUPER HUME PLUS™ and remain very cost effective on your per acre/ha costs. When applying it with herbicides you can cut back your herbicides by 33%-50% and still gain the same result from the herbicide. How is this possible?

Humic / Fulvic ACID is one of the worlds best natural chelating agent. Combined with the other ingredients we added in this mix they all work synergistically as a super chelate. The natural chelates increase the flowability of the herbicide or fertilizer to enter into the rootzone or leaf tissue.

STORAGE

Keep container sealed tightly when not in use. Do not expose to sunlight for long periods of time. Store in temperatures between 5 C (41 F) and 25 C (77 F).

Dispose of Waste Material according to local, state, and Federal environmental laws and regulations.

DISCLAIMER

It is recommended not to use this product with fungicides or pesticides. However, if applied with a fungicide or pesticide, it is the user's responsibility to conduct a trial application on the crop(s) to be sprayed with this mix of chemicals to determine compatibility of products and compatibility with crop(s) sprayed. When mixing with other spray materials a jar compatibility test is recommended. Harmful if swallowed. Avoid contact with eyes, skin, and clothing. If on skin, wash with large amounts of soap and water. If in eyes, rinse repeatedly with clean water. If irritation persists, obtain medical attention.

**Ingestion: If patient is conscious, give large quantities of water. Do not induce vomiting. Call physician.*

GUARANTEED MINIMUM ANALYSIS

Soil Amending Ingredients:	
Seaweed	4.000%
Surfactants	10.000%
Total Other Ingredients	74.000%
Non-Plant Food Ingredient:	
Humic Acid /Fulvic acid	12.000%

Derived from: Ascophyllum Nodosum Seaweed and Polyhydroxycarboxylates and Leonardite Shale.

CAUTIONS

Because of the nature of Super Hume Plus™ it should not be applied with High Calcium or Phosphate material.

COMPATIBILITY

A jar compatibility test is recommended before mixing with any product other than water in the tank to insure compatibility with foreign spray mixes.

Not compatible with High concentrated Calcium carbon or low pH mixes

APPLICATION

SOIL: *Apply as a soil conditioner for helping chelate the granular fertilizer

Apply 1 to 2 pints SUPER HUME PLUS™ with sufficient water to cover, per acre incorporated along with your starter fertilizer.

FOLIAR: Mix 1-2 pint(s) SUPER HUME PLUS with sufficient water to cover, per acre. Mix in tank with herbicide spray and follow herbicide spray directions for applications. Although not necessary, Consider cutting herbicides spray rate back by up to 1/3 of recommended rate.

***REPEAT IN EVERY HERBICIDE SPRAY APPLICATION*.**

ORNAMENTALS: Mix a 0.5-1% solution with water; apply to tops and bottoms of foliage.

Mix with liquid fertilizers.
